## Introduction message

When we celebrate books, we celebrate activities — writing, reading, translating and publishing — which helps individuals to raise and fulfil themselves, and so we celebrate this in a fundamental way, the freedoms that make possible. Join us as we celebrate with all older persons who dare to try no matter their age and disabilities.

I am so delighted to introduce you to STORIKA, the 50 legends story book that will inspire and motivate communities to work hard no matter their age restrictions. We have joined hands and have had support collecting the stories and now we are here to celebrate.

Key takeaway from reading this book: We are searching for more interventions in supporting older persons in expanding their business, equipping them with more skills in their work, simplifying their work and connecting them with marketing.

Today as we recognise and celebrate 50 of them in this book, the ones that dared, but then again tomorrow we need to reach more and celebrate them under our partnerships.

Karibu saveelders.
